PROFILE

As a Front-end developer, I have expertise in HTML, CSS, JavaScript, React.js, MySQL, and Express.js. I aim to further my skills through internships to broaden my knowledge. I am eager to collaborate with a team and work alongside senior developers to boost my experience. Rest assured, I am committed to delivering my best and contributing to the success of your company.

WORK EXPERIENCE

Admin Dashboard

Front End Developer

- I have developed the front end for the admin panel in my learning project.
- In this project, I gained experience in adding theme toggle functionality.
- I also learned React Router DOM in that project

Leadbud website

Front End Developer

- My initial freelance project was a valuable learning experience.
- The project involved developing a website with 10 to 12 pages. Some pages were simple, while others presented challenges with intricate animations.
- The animations in this project featured scroll-triggered displays and sliders equipped with buttons for manual navigation or cursor-controlled sliding.

WhatsApp Replica

MERN stack developer

- I honed my backend skills by creating a MERN stack WhatsApp replica, featuring live chat, account creation, and login functions.
- Feel free to check out this project on my GitHub profile.
- I have a variety of projects created for practice and enjoyment, accessible through my GitHub account.
